Advisory Boards

School Advisory Board

The School of Art + Art History + Design Advisory Board provides guidance and counsel to the school director on issues that impact the school’s ability to carry out its core mission of education, research, and service as well as on current trends and future directions in art, art history, and design.

The advisory board helps build relationships with key constituencies; increase awareness of the school; strengthen ties with the community; provide valuable information from the broader community to faculty leaders; and support fundraising efforts for the School of Art + Art History + Design.
