Each year, through DESIGN 166 and the application process, the Design faculty select approximately 55–60 students for the Bachelor of Design program. These new students enter into a year-long sophomore curriculum — a series of six courses that address broad themes and issues in design concepts, methods, and values.

At the end of the sophomore year, the students submit their preference for a specific major: Visual Communication Design, Industrial Design, or Interaction Design. Read more about the selection process.

BDes students must maintain satisfactory progress throughout their sophomore year. A grade of lower than 2.5 will result in a meeting between the student and faculty to review the student’s performance and to discuss whether appropriate progress can be achieved.
