The University of Washington’s COVID-19 Prevention Plan (“University Plan”) helps ensure the health and safety of personnel by reducing the potential for COVID-19 transmission at University locations. The measures are based on Washington Ready COVID-19 guidance; Washington Department of Labor & Industries (L&I) requirements, the Governor’s Proclamations for Higher Education; Washington Ready; COVID-19 Vaccination Requirements and guidance from state and local public health agencies. This plan is updated as regulations and public health guidance change. UW Medicine medical facilities follow UW Medicine specific policies and procedures.

Key personnel charged with developing this plan:
Director Jamie Walker, jwalk@uw.edu
Administrator Pam Lynne, pamlynne@uw.edu
COVID-19 Point Person Ruth Kazmerzak, askartadmin@uw.edu

Table of Contents

1. Vaccination

5. Face Coverings, Personal Protective Equipment (PPE), physical distancing and alternative strategies
6. Communication and Training
7. Guidelines for Venues and In-Person Events
8. Novel Coronavirus (COVID-19) Resources
1. VACCINATION

Employees and Students

COVID-19 vaccination is the most critical element of the University's COVID-19 Prevention Plan. All personnel and students are required to be fully vaccinated against COVID-19, unless a UW-documented medical or religious exemption is approved.

The vaccination requirement is detailed in the UW COVID-19 Vaccination Policy; all UW units, personnel, and students must comply with this policy.

Students who are employed by the University must submit both the student and personnel COVID-19 Vaccine Attestation Forms.

Volunteers or Contracted Personnel

Vaccination mandates also apply to anyone who is a volunteer or contracted to work in UW properties/facilities. In the School, this may often look like volunteers, guest artists or guest speakers (either paid honoraria or without a payment). Any individual who already works for UW would follow an employee verification process. Individuals “managing” a volunteer or guest are responsible for checking vaccine documentation prior to an on campus visit. This can be achieved via a zoom meeting and by filling out the School’s COVID 19 Vaccine verification for volunteers and contracted individuals form with the individuals name and the date you verified their vaccine status.

In order to check vaccinations status, view both sides of the document when verifying vaccination and maintain a tracking system. Below is a brief outline of information for “managers” of guests/volunteers and your responsibilities for ensuring individuals are fully vaccinated:

- Personal attestation is not an acceptable form of verification of COVID-19 vaccination.
- Do not copy or store copies of vaccine documentation
- Only store basic information (i.e. name and date vaccination status verified), do not copy or store copies of vaccine documentation, and communicate that emailing documents will not suffice for verification.
- You are also responsible for checking this information to maintain privacy: verify vaccination status in a private setting
- It is recommended to add the vaccination requirement to any invite and verifying vaccine before an MOU or offer is made.
A sample notification to request vaccination verification from volunteers/contracted personell.

Dear XXX

Governor Inslee’s proclamation 21-14.1, requiring all University Personnel who are considered “employees” of Washington higher education institutions under the mandate, to be fully vaccinated by Oct. 18, 2021, as a condition of employment. This policy extends to anyone who may be contracted for work or who is a volunteer at the University. All “workers” must provide proof of full vaccination against COVID-19. I will need to inspect your vaccine documentation no later than XXXXX. Please, DO NOT send me copies of your documents via email. I must only view these documents in person or via zoom. I have the following times available to do so: XXXXX

If you absolutely cannot make this time, please contact me to schedule a one-on-one appointment.

Acceptable documents include:

- CDC COVID-19 Vaccination Record Card or photo of both sides of the card;
- For zoom verification please be prepared to hold up a paper version of the card not a picture on a phone display. Pictures on phones don’t read well.
- A screen share is possible as well.
- Documentation of vaccination from a health care provider or electronic health record;
- State immunization information system record; or
- For an individual who was vaccinated outside of the United States, a reasonable equivalent of any of the above.
2. PROCEDURES FOR SICK AND SYMPTOMATIC PERSONNEL

The SoA+AH+D is required to take measures to prevent sick personnel from entering the worksite, and reporting suspected and confirmed COVID-19 cases and close contacts to EH&S.

Symptom monitoring

The University offers guidance for health care facilities and other units with location-specific requirements for submitting a symptom attestation. Individuals are required to self-monitor daily for symptoms and stay home or go home if they are sick or have any symptoms of COVID-19 infection.

Personnel who experience any symptoms of COVID-19 infection, including fever (100.4 degrees or higher), cough, shortness of breath or difficulty breathing, fatigue, loss of taste and/or smell, chills, sore throat, congestion or runny nose, headache, muscle or body aches, and gastrointestinal symptoms, such as nausea, vomiting or diarrhea, are required to follow these instructions:

Stay home: If you are sick, you must stay home and away from other people, even if you are vaccinated and/or have mild symptoms. University units are required to direct personnel to follow the steps in the FAQ “What do I do if I feel sick?” which includes the information below.

1. Get tested for COVID-19

   • If you are enrolled in the Husky Coronavirus Testing program, report your symptoms in your daily symptom survey, and you will receive testing instructions. Do not go to school or work until you receive your test result, even if you feel better. If you are not enrolled in the Husky Coronavirus Testing program, you can get tested with your personal health care provider or at a public testing site.

   • Notify the COVID-19 Response and Prevention Team as soon as possible if you test positive for COVID-19 at covidehc@uw.edu or 206.616.3344. UW medical center personnel should contact their respective employee health services.

   • Follow public health guidelines to help you recover and protect others from getting sick. These actions include staying home and physically away from people and pets, wearing a face covering, and being stringent about hygiene.

   • Read the FAQ “What do I do if I have confirmed or suspected COVID-19?” on the UW COVID-19 frequently asked questions webpage for more information about steps you'll need to take. You can also learn more from Public Health – Seattle & King County and the Washington State Department of Health.

2. Report close contact
Notify the COVID-19 Response and Prevention Team if you have close contact with individuals who have COVID-19, regardless of your vaccination status.

Close contact means being within 6 feet of a person with COVID-19 for a cumulative total of at least 15 minutes during a 24-hour period (even if both individuals were wearing face coverings), living with or caring for a person who has COVID-19, or having direct contact with infectious secretions (e.g., being coughed on, kissing, sharing utensils). The exposed individual is required to follow the quarantine requirements outlined in the FAQ "I may have been exposed to COVID-19. What should I do?"
3. GOOD HYGIENE

Supervisors are required to remind personnel they can reduce the risk of spreading COVID-19 by doing the following:

- Wash hands often with soap and water for at least 20 seconds. If water is not available, use hand sanitizer with at least 60% alcohol content.
- Avoid touching your eyes, nose or mouth with unwashed hands.
- Avoid contact with people who are sick.
- Stay home while sick and avoid close contact with others, even if you are vaccinated against COVID-19.
- Cover your mouth and nose with your elbow or a tissue when coughing or sneezing, and immediately dispose of the used tissue.
- Secondary handwashing or sanitizing stations may be set up with either hand sanitizer or wipes/towelettes.

Personnel must have access to soap and running water to wash their hands after touching any surface or tool suspected of being contaminated, before and after eating or using the restroom, and before touching their face. Secondary handwashing or sanitizing stations may be set up with either hand sanitizer or wipes/towelettes.

Place posters in visible locations to remind personnel of key moments to wash hands:

- **Before, during**, and **after** preparing food
- **Before** eating food
- **Before** and **after** caring for someone at home who is sick
- **Before** and **after** treating a cut or wound
- **Before** exiting the studio, classroom or office.
- **After** using the toilet
- **After** contact with high touch surfaces (e.g., elevators, lobby areas, reception desks, etc.)
- **After** blowing your nose, coughing, or sneezing
- **After** removing gloves or other personal protective equipment.
- **After** touching an animal or animal waste
- **After** touching garbage

CDC – What you need to know about handwashing (video)

Return to Table of Contents
4. CLEAN SURFACES

SoA+AH+D required to clean (and disinfect as needed) their worksite surfaces regularly in accordance with the University’s COVID-19 Cleaning and Disinfection Protocol. Units are required to provide cleaning and disinfection products, along with the appropriate PPE and instructions for the frequency and safe use of products.

University custodial units clean high touch surfaces in common areas of buildings, such as restrooms, stairwells, and elevators. The University maintains a central procurement site for COVID-19 cleaning supplies and PPE. (Visit the UW Procurement How to Buy page for details.)

University units:

- Keep a cleaning schedule to maintain general housekeeping to prevent buildup of dirt and clutter.
- Make cleaning supplies available for workers to do spot-cleaning when necessary. Consider single-use disinfectant wipes for high touch points.

Frequency: Clean work areas regularly.

- For surfaces and equipment touched by multiple workers (e.g., doorknobs, tables, computer keyboards, handrails, exercise rooms), clean and disinfect daily, between uses, or when visibly unclean.
- For surfaces and equipment touched by one individual, clean and disinfect periodically, when unclean, as a minimum.

Locations of disinfecting and cleaning supplies

Art Building

- Disinfectant spray bottles, paper towels/cloths and gloves are located in the mailroom (room 102A)
- Please take only the minimum amount needed. Supplies are only available in limited quantities due to nationwide supply issues. Resources are scarce.
  - Contact pamlynne@uw.edu if supplies need to be restocked.
- Check with technician regarding the disinfecting procedures for specialized equipment as some chemicals can ruin work surfaces.
- Report any problems and concerns to the technician, Program Chair, and the Director of the School.

CMA

- Disinfectant spray bottles and gloves are located near every bathroom and water fountain as well as the kitchen.
- Supplies of disinfectant and hand cleaner will be available near the sinks in the Foundry (room 114) and in the Kitchen (room 101).
• Any equipment in the wood or metal shop needs special instruction for disinfection as the chemicals can ruin work surfaces. Check with a technician.
• Report any problems and concerns to a technician, Program Chair, or the Director of the School.

Sand Point
• The cleaning and disinfection supplies are stored in the cabinet under the kitchen sink. The student assistant will monitor and replenish the stock.
• Everyone, after using one’s studio, should clean it before leaving the facility, including the door handle. The Sand Point OSRP (On-Site Research Plan) student assistant will clean door handles of bathrooms, brush-wash room, and the doors by the west entrance, and log the cleaning time on the "Door Handle Cleaning Record."
• The Sand Point OSRP graduate student assistant is Yongqi Tang. They monitor the implementation of the plan, order the necessary supplies, and report any problems and concerns to the Sand Point Coordinator Helen O’Toole, the Program Chair, Zhi Lin, and the Director of the School.

Safe use of products: Follow the manufacturer’s instructions for use of all cleaning and disinfecting products, and use personal protective equipment as required.

Use one of the following to disinfect hard, non-porous surfaces:

● EPA-registered disinfectant for use against SARS-CoV-2 or
● Alcohol solution with at least 70% alcohol or
● Freshly prepared bleach/water solution

Avoid putting disinfectant gels or liquids on electronics, including elevator buttons, unless they have been indicated as safe for those devices.

Resources are available on the EH&S website to assist units to safely use disinfectants to prevent the spread of COVID-19.
5. FACE COVERINGS, PERSONAL PROTECTIVE EQUIPMENT (PPE), PHYSICAL DISTANCING AND ALTERNATIVE STRATEGIES

All individuals at the SoA+AH+D, including faculty, staff, students, contractors, vendors and visitors must adhere to the UW COVID-19 Face Covering Policy.

To ensure the health and safety of the University campus community and the public, face coverings are required to be worn at the University of Washington, regardless of vaccination status:

- **Indoors** when other people are present, and in all public and common areas, such as lobbies, hallways, stairways, restrooms, elevators, and in shared vehicles;
- **At any outdoor** in-person event hosted or sponsored by the University or conducted on University of Washington premises with **500 or more people in attendance**.

For other outdoor settings, face coverings are strongly recommended to be worn outdoors by all individuals, regardless of vaccination status, when in crowded settings and in settings where there is a decreased ability to consistently maintain a physical distance between others.

Visit the [Face Covering Requirements webpage](#) for further details and to read frequently asked questions, including "When is it okay to remove my face covering?" for a list of exemptions to the policy.

Face coverings are required to be provided to personnel who are working on site at a University location. Personnel must be trained on the proper use, care, storage and disposal of face coverings and PPE. University units should refer to the [EH&S Guidance on Facemask Use for Preventing the Spread of COVID-19](#) for training personnel on the selection, care and use of face coverings and facemasks.

**Public Spaces:** Members of the public, customers, visitors, vendors and contractors at a University location are required to follow the University's COVID-19 Face Covering Policy at all times when on campus, including posted requirements in specific buildings or spaces.

In certain work settings, PPE may be required according to potential risk of exposure to COVID-19. Refer to the [Workplace COVID-19 Risk Level and Selection of Personal Protective Equipment (PPE)](#) guide and the [Guidelines for Personal Protective Equipment](#) for additional guidance on the selection and use of PPE.

**Physical Distancing**

Physical distancing is recommended for all individuals while indoors at a University location, especially in crowded settings, in areas that are not well ventilated, and when actively eating and drinking.

- Refer to the [Eating and Drinking Guidance for COVID-19 Prevention](#) for best practices on preparing and using eating spaces and food sharing.
- *Physical distancing is required* in health care, child care, and K-12 settings.
There are no current COVID-related occupancy limits in UW spaces; however, normal building and fire code occupancy limits still apply.

**Alternative strategies**

The University utilizes a combination of strategies to minimize COVID-19 risk in the workplace. Units should evaluate whether additional or alternative strategies are necessary in their work settings based on their likelihood of exposure to COVID-19, such as in health care or other higher risk settings.

Alternative strategies are listed below in order of *most effective to least effective*:

1. Keeping people with symptoms from entering the workplace
2. Promoting vaccination
3. Using engineering controls (e.g., exhaust ventilation, physical barriers)
4. Further physical distancing requirements where not already specified
5. Administrative controls (e.g., stagger work shifts and/or breaks)
6. Wearing face coverings and PPE where required

**Steps for selecting and implementing an alternative strategy:**

1. Request EH&S review and unit leadership approval to consider an alternative strategy.
2. Develop a [job hazard analysis](#) that identifies the hazards and control strategies to minimize the risk of exposure.
3. Train personnel on alternative strategies used. Document the training.

[Return to Table of Contents](#)
6. COMMUNICATION AND TRAINING

The SoA+AH+D is required to communicate to personnel about COVID-19 prevention on campus, and train personnel on the contents of the University's COVID-19 Prevention Plan and the unit-specific COVID-19 Prevention Plan. Training must be documented.

The University's COVID-19 Safety Training: Back to the Workplace is required for all University personnel prior to or upon returning to on-site work. In addition, units (e.g., COVID-19 Site Supervisor or personnel manager) are required to train personnel on the contents of the unit or site-specific COVID-19 Prevention Plan.

Attachment B in this document can be used to document unit or site-specific COVID-19 training. Unit or site-specific training is conducted before or on the first day of returning to work at a University location, reviewed as updates are made, to explain the protective measures in place for all personnel in a unit or worksite. Personnel must be trained, even if they have been performing critical work on site at a UW work location. Training is required to be provided in a terminology best understood by personnel.

Communicate safe practices

All University units are required to communicate to personnel about ways to prevent the spread of COVID-19, including reviewing their unit and site-specific procedures for COVID-19 prevention.

The UW Stay Healthy, Huskies toolkit has posters and graphics in various formats to post and communicate in your work area. Download and place posters in common areas, such as in break rooms, lunchrooms, lobbies, and bathrooms.

1. Place the “Back to the workplace” poster in work areas and reception areas.
2. Place the “Face coverings are required” poster in entrances to buildings and work areas.
3. Place the “Clean and disinfect” poster near shared equipment that must be cleaned after each use and in common areas, such as meeting rooms and break rooms, and near high-touch surfaces.
4. Place the “Wash your hands the right way” in bathrooms and near handwashing stations.
5. Place signage at designated eating locations according to the Eating and Drinking Guidance for COVID-19 Prevention.
The University's Novel coronavirus & COVID-19: facts and resources webpage provides information about COVID-19 for the campus community and is updated regularly. Encourage personnel to read guidance from the COVID-19 frequently asked questions webpage, including:

- What do I do if I feel sick?
- What do I do if I have confirmed or suspected COVID-19?
- I may have been exposed to COVID-19. What should I do?

COVID-19 information and workplace safety requirements are available in 36 languages from the Washington State L&I COVID-19 Resources webpage.

**Hazard communication for personnel working with disinfectants**

It is important to communicate the potential hazards and safety measures to personnel working with chemical disinfectants. Chemical disinfectant exposure may cause health issues if used improperly, so it is important that health and safety considerations are accounted for prior to use.

Information about working safely with disinfectants is available on the EH&S website:

- COVID-19 Chemical Disinfectant Safety Information
- Workplace COVID-19 Risk Level and Selection of Personal Protective Equipment (PPE) guide
- Guidelines for Personal Protective Equipment

Visit the Chemical Hazard Communication webpage on the EH&S website for additional information about communicating chemical safety.

Any additional questions, particularly regarding specific School policies, procedures or facilities, should be directed to School COVID-19 Point-Person

Ruth Kazmerzak, askartadmin@uw.edu.

7. GUIDELINES FOR VENUES AND IN-PERSON EVENTS
COVID-19 Prevention Guidelines for In-Person Events
The COVID-19 Prevention Guidelines for In-Person Events (Word) provides guidance for preventing the spread of COVID-19 and for compliance with Washington state and local public health requirements at in-person events. For events that require approval through the Use of University Facilities (UUF) process, event organizers must submit a completed In-Person Event COVID-19 Prevention Plan with their UUF Request Form. For events that don’t require approval through the UUF process, event organizers must submit a completed In-Person Event COVID-19 Prevention Plan to the relevant University unit representative or sponsor.

COVID-19 Vaccination Verification Policy for Venues and In-Person Events
The purpose of the COVID-19 Vaccination Verification Policy for Venues and In-Person University Events is to help prevent COVID-19 transmission in the UW community in accordance with the new state and local vaccine verification requirements, Washington Ready re-opening plan, state and local worker safety rules, and public health guidance, and the University’s COVID-19 Prevention Plan, and COVID-19 Prevention Guidelines for In Person Events.
